# Tropical Forests (Jones And Bartlett's Series On Ecosystems And Biomes)

## Synopsis

The first text in a series of single topic ecology books, *Tropic Forests* is an ideal text or supplement for introductory biology, ecology, and environmental science courses. It provides students with an accurate, easy to read, and easy to understand account of this important environmental topic that is often overlooked or glossed over in general texts. It's narrative style and clear illustrations and diagrams engage students, and paint a clear picture of the important concepts presented throughout the text.

## Book Information

Series: Jones and Bartlett's Series on Ecosystems and Biomes

Paperback: 198 pages

Publisher: Jones & Bartlett Learning; 1 edition (August 7, 2008)

Language: English

ISBN-10: 076375434X

ISBN-13: 978-0763754341

Product Dimensions: 5.9 x 0.5 x 8.8 inches

Shipping Weight: 9.6 ounces (View shipping rates and policies)

## Customer Reviews

The world's tropical forests are sometimes referred to as the 'lungs of the world', being as they are, a major source of oxygen for the planet. They are also the home of incredibly diversified flora and fauna. That's why their continuing diminishment is of such vital concern. A part of the outstanding 'Ecosystems and Biomes' series from Jones & Bartlett Publishers, "*Tropical Forests*" by Bernard A. Marcus (Genessee Community College, Batavia, New York) provides an analytical and descriptive survey of world tropical forests in terms of the issues confronting them today. Addressing soil and water concerns, the ecosystem networks of plants and animals, the varying nature of tropical forests, and a great deal more, "*Tropical Forests*" is a superbly written and presented introduction. Of special note is the chapter focusing on the role tropical forests play in our global climate. Enhanced with the inclusion of an extensive glossary and a comprehensive index, "*Tropical Forests*" is an ideal classroom textbook and strongly recommended to the attention of non-specialist

general readers with an interest in contemporary global environmental issues.
