## Customer Reviews

Extraordinary book. Caters for the beginners to the advanced. Strips palmistry down to the absolute bare essentials yet provides details of all situations. Makes the complicated seem simple which is a sign of a true genius. Absolutely accurate, absolute no guff in the book.

I dabble in various mysticism arts and really think this is a wonderful book for learning the craft. It's textbook oriented which is appropriate to learn something like palm reading. Not many places or people offer a class but if they did this would be the text. I purchase copies as I find them because the book is out of print.
