Mark Zuckerberg And Facebook (Internet Biographies (Rosen))

Synopsis

With over 2,000 employees, 800 million users, and annual revenues of more than \$4 billion, it's hard to imagine that Mark Zuckerberg in his Harvard dorm room started Facebook less than 10 years ago. This is the astounding story of Zuckerberg's launch of "thefacebook," as it was originally called in 2004, and with it the revolutionizing of business and the way we communicate, and spread messages, throughout the world. This new way of communicating has inspired great social change. Readers discover how business success is not just financial, but also humanitarian.

Customer Reviews

Dear Mr. Zuckerberg: This is Bridget Kelly. You may know me from Starbucks. There is a problem with your ceo. She really works for yahoo. Besides, she is a nuisance to society. I am writing for two reasons. There is a significant problem with your website Facebook login. I do not understand why you dont follow or take care of your own business. No, this is your problem not hers. People cannot login if the changed their email address and forgot their own identity password for facebook. I will not use Facebook again as a result. Now, lets talk about your stupid portfolio. If you did not already know you are now on the United States only Stack Market. Your investments are wrong. I bet everyone in the nation bought stock in your company and now they are angry because there is

currently no dividend return. Get the facts straight about your wedding to. You accept advertisements on Facebook. This is how you personally get paid thru bonds or stocks. Read your own networking books. Do you comprehend that you must pay your advertisers. Your not doing this. I don't mind facebook, I'm just not into legally blond and Harvard sorority style affairs. O' Pin me. Pay your advertisers and get out of my life. Seriously, your work and loads are driving me up an insane wall. I do not understand why you can't deal with the people that maimed you. I told you simply to see the movie the Social Network and you did not do it. Finally, there is obviously a prob with Hillbilly Handfishing. Good Luck-you know Henderson-call him not me next time and there will be no next time. PS my facebook acct should have been turned into the government under Bush Privacy Act Yes Privacy Act JR. With Facebook, I was trying to create a profile for a new book called Statue. I was also trying to discover what treason really means. Its not about a fire. You don't work for the government mark but some of your friends might know or understand the math for the new Einstein code, I do government but I am not paid nor ever was for this. My largest grievance with society is that they do not communicate by simple telephone anymore. I don't do Enron ladies and gentleman. Again, my grief relies not on monetary habits but on the fact that a simple conversation with me would have prevented these so called fake cyber attacks. You did not need to drug me to understand my ability. I blame Andes-they own candies. Good Day Mr. Zuckerberg with a u.
