Fish Histology: Female Reproductive Systems

Synopsis

This volume describes the myriad ways in which fish have approached problems of reproduction • it is an amply illustrated comparative study of the microscopic structure of the female genital systems of fish. The timing of its appearance is auspicious in that it coincides with the decline of the golden age of descriptive morphology. It is a compilation of thousands of micrographs from classic works in the field. The volume should prove valuable to investigators studying fish in areas such as ecology, physiology, and reproductive biology who may view histology as essential in their work but have little background in this area.

Book Information

Hardcover: 598 pages

Publisher: Springer; 2007 edition (October 8, 2007)

Language: English

ISBN-10: 1402054157

ISBN-13: 978-1402054150

Product Dimensions: 8 x 1.3 x 10.9 inches

Shipping Weight: 3.5 pounds (View shipping rates and policies)
