Wood Gasifier Builder's Bible: Advanced Gasifier Plans To Build Your Own Wood Gas Generator. Make Free Biofuel At Home

Synopsis

Turn wood into free fuel. The Wood Gasifier Builder's Bible is a step-by-step construction manual to build a powerful woodgas generator with advanced features, yet needing only a minimal build budget. Wood gasification extracts the stored sunlight in wood to create a gaseous biofuel rich in hydrogen. It's like having your own personal scale natural gas refinery. Watch videos at WoodGasifierPlans.com How would you like to make your own free fuel... for life? Cut your utility bills, alt fuel vehicles and farm equipment or just go way off-grid. It's all possible using locally available wood you can pick up off the ground and a little known technology that helped kick off the Industrial Revolution. Does it work? It powered 1 million installations in Europe during WW2 and saved the continent. Now, this new book builds on those traditional WW2 designs and improves them dramatically with automation and advanced heat recycling for better performance and stronger, cleaner gas. This book is for you if you are a: biofueler, solar panel owner, back to the lander, off-gridder, hydrocarbon hacker, hydrogen enthusiast, prepper, patriot, survivalist, permaculturalist, welder, engineer, fabricator, blacksmith, wood worker, alternative fuel researcher, WW2 buff, inventor, tinkerer, or just a curious minded problem solver. Finally a construction manual that spells it out step-by-step and divulges the secrets to the lost art of wood gasifier construction in easy to follow detail. A must-have book in your library. Do it right the first time and save enormous amounts of time and money. The Wood Gasifier Builder's Bible will show you how.

Book Information

Paperback: 192 pages

Publisher: CreateSpace Independent Publishing Platform; First edition (June 29, 2014)

Language: English

ISBN-10: 1500362271

ISBN-13: 978-1500362270

Product Dimensions: 8.5 x 0.4 x 11 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #174,508 in Books (See Top 100 in Books) #41 in [Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Alternative & Renewable](#) #678 in [Books > Science & Math > Nature & Ecology > Conservation](#) #1825 in [Books > Science & Math > Physics](#)

Customer Reviews

I bought my copy of Ben Peterson's book in late August on . Thanks!! I've had time now to compare it against the other 34 books, papers and pdf downloads in my woodgas collection. These range from 1907 to 2012 originally published. Only maybe three of these could you actually build a complete system from. And two of those three are also pay-for and they are only directly purchasable. The third a gov't "free" is literally a trash can system. This book has more step by step pictures in it than any three other publications of mine combined. This book's system the widest size range of IC engine usability of them all. And this design addresses the limitations points in traditional designs. This will be very THERMALLY balanced with its three layers of insulations. Has Drop-in replaceable parts. NO Cones. NO range use limiting cyclone. Has a unique char gentle conserving active grate system. And a "magic box" four purpose heat/recycler fuel/economizer side box postulated but not done since 1974, and ~1944 previous. And never done until now combining two 21st century benefits unique to this system. This "BensGift" book system is the one to hand to a welder friend and ask, "Please build me this." And he/she will; and can, with every single weld in sequence pictured out. No other book - NO other woodgasifier plan set does this level of detailing. The system itself is a complete engine fueling solution. A TOOL. Not some geeky toy. I know the differences now 5 years into this "wood to shaft power" as a REAL, and Useable, Now, Today power/energy solution. Under belt now with 12 different gasifier systems Operated on at least 20 different engines. 1000 hours combined engine power gasifying now. 30,000 hours woodgasifying intentionally for heat. 100,000 lifetime hours woodstoveing for heat. This BensGift book system is the one to build/have built if you want to become a Real Woodgaser too. Buy this book for You. Buy this book for a Loved-One. Buy this book for your children. The Future is now. "Keep the Lights of Reason On" with renewable, sustainable wood fuel. Washington State Steve Unruh - owner of serial #1 Victory SS hearth; and the 1st stainless steel GEK kit gasifier.

Great book. Step by step, detailed instructions with great drawings.. But good lord people, do not, DO NOT buy from one of these shysters selling this for a thousand dollars on . Do a search on your favorite search engine or video site and get the author's website. He'll sell it to you directly for forty or fifty bucks. I can't believe the price as of May 2015.

Agree completely with the first post, a little pricey at first glimpse however gives exact measurements. This book is almost an engineer DIY degree of in-depth how to.

A "Bible" on the subject would explain theory of operation and give enough engineering details to

allow a person to design / build their own unit. This is an assembly manual for ONE approach with an allowance for some customization. What it does, it does well, but let's not get carried away with out description, please.
